Thanks Geiger! What you sent contains useful information we can use against you people! And we will!

"Dan" has it exactly right when he says:

If they are able to "justify" their actions, it's most likely because they simply see this as WAR. War against the "denialists". Nothing more.

When you're in a war, there are no rules.

This IS a war, there ARE no rules, and we WILL crush you, one at a time, completely and utterly (at least the more influential ones; foot-soldiers like you aren't worth bothering with).

John
