Private and confidential

Gil, I would like to privately talk to you on the phone.

TAC is the new Semmelweis, and you should join us if you are for due process. I would never give false testimony against them, no matter how much you threaten, no matter how many jobs you and Clark cost me. TAC has been crucial to my financial well-being. Without TAC and the pharmaceutical industry, I could not withstand Clark's attacks on my employment. Clark continues to use private email that I sent you to harm me. Do not send this to any other person. I don't want Clark to know where

I am, or where I am working.

It is time for you to call Clark off.

Do not copy him or anyone on this email, or they will know where my new job is. You will be responsible. The only reason you copy people on my private email to you is to harm me. You are assisting Farber/Bennet and Clark, even though I try to reason with you and try to help you. Call me, or let me know when to call you.

Subject: Re: Let's discuss and resolve these difficulties

Private and Confidential

Today, Clark sent the threat that i "will never work in medicine again" if I do not do as Clark says. Clark states he is following your instructions. Clark is using email I sent to you. I am not using Clark as a reference. Clark is calling up any hospital I apply to and blocking my employment. This is completely opposite of what Semmelweis stands for. Clark and Terry Bennet are defaming doctors, and robbing them of their jobs, and threatening them. Dr. Ullberg continues to assist Clark in his misconduct.

Because emails have not been kept private, I do not think it is wise to discuss this in email. Let me know when you return from Belgium, and I will look forward to speaking to you on the phone. This will prevent misunderstandings, and prevent unwanted dissemination of private materials.

Thank you, and have a good trip.

Subject: Fwd: New Scientist -- AIDS denial: A lethal delusion

Private and Confidential

Gil,

I am glad we have decided to work together on this topic. Here is an important article. Why don't we issue it jointly?

It really doesn't matter what any one's opinion is. What matters is the scientific data. The data shows that anti-retrovirals save lives, and are part of quality care of AIDS patients.

Indeed, I'm recommending we give the "Clean Hands Award" this year to TAC. Of course, this should be by vote of all dues-paying SSI members. I believe SSI will welcome nominations of anyone who has made a significant contribution to quality patient care. We are all patient advocates first, and doctor advocates second.

Fortunately, the by-laws have been amended so that private detectives are no longer eligible to join SSI.

Hi Gil,

All of the articles below are from TAC members. What else would you like to know?

TAC stands for quality care for HIV patients, and for all patients. They stand behind the Hippocratic oath, and for scientifically based medicine. They believe that doctors, not private detectives or journalists should treat patients.

What else would you like to know? Just examine their articles, their websites, and their principles. If you need to talk to TAC leaders, I'll put you in touch.

I am sure you will agree that there is no real controversy, that Clark has behaved contrary to all SSI principles. Finally, I'm sure you believe in democracy, and the SSI membership overwhelmingly rejects Clark and Ullberg.

Finally, I know you have no patience for the Mahmoud Ahmadinejad, who denies that the holocaust happened. I'm sure you have equal antipathy for any person who denies the historical fact of the AIDS holocaust. You have no patience for anyone who works with HCA to create a holocaust against Doctors. Clark has worked with HCA-affiliated Universities in Atlanta to block employment of doctors. I am sure you will denounce Clark, and return to the principles of SSI.

TAC has denounced Clark for his anti-doctor retaliation. This alone is enough for us all to issue a joint release with TAC. We don't have to agree on everything. We all should agree on the Hippocratic tradition, on quality care, and unite against the retaliatory actions of Clark and Dr. Ullberg.

Subject: TAC backs Hippocratic Oath!

Gil,

Good news! TAC has agreed to issue a joint statement backing the Hippocratic Oath and quality patient care. If you agree with these traditions, feel free to sign on.

If you do not agree that medical treatments should be backed by science, kindly send your own press release explaining why you do not back Hippocratic traditions, quality care, and scientifically designed treatments.

Thanks.

Private and Confidential.

Hi Gil,

You've asked me for reasons we should jointly support TAC. Perhaps the biggest reason is that they are protecting doctors against Clark's retaliatory bad-faith and violent attacks. Why don't you, I and TAC could issue a joint statement against bad faith attacks against doctors by anyone, including attacks by Clark Baker and his legal counsel, Dr. Ullberg? I am certain that you detest these bad faith attacks.

Thanks Shanna,

Eventually, even the hold out doctors will endorse the Hippocratic oath. Thank goodness for TAC. I'm glad they have joined this initiative. All the best,

Really nice work Jim!

Warmly,

Subject: Please back Hippocratic Oath on President Website

Dear Friends,

SSI president Dr. Blake Moore has called on all members to support initiatives for open and transparent govt, especially during this time of medical crisis.

Please support the Hippocratic traditions

This should be a no-brainer. Surprisingly, some doctors associated with our group are reluctant to endorse the Hippocratic oath, and to back quality care for all patients, including patients with devastating diseases like Cancer and AIDS. I hope everyone will sign on and leave a comment leaving no doubt that we support Hippocratic tradition, and scientific quality care.

Urge everyone to follow Dr. Moore's example

Here's where you come in. In response to President Obama's campaign promises to promote a more transparent and open government, the White House created an Open Government Directive, comprised of three phases for citizen participation; Brainstorm, Discuss, Draft. We called on the whistleblower community to support Federal Whistleblower Protection during the "Brainstorming" phase. Thanks to your response, it made 2nd place under "Transparency: Open Government Operations"! We need your voice again in the "Discussion" phase, to ensure that federal whistleblower protection is part of any credible dialogue on open-government. The deadline to post a comment is this Friday, June 20th. We will contact you when the "Drafting" phase begins as well.

How to Participate:

1. Register here and create a user name
2. Once you log-in, we suggest commenting on the blog entitled "Transparency: Open Government Operations." To comment, scroll to the bottom of the page and under the option to "submit a comment," voice your support for federal whistleblower protection

My comment: The Hippocratic Tradition must be upheld

Doctors and other medical people are totally in agreement with the comments above. We are completely united that transparency is the key to ensure that Hippocratic traditions and quality patient care are maintained. Huge reforms are being debated. The public must know that their doctor works for the individual patient.

Especially when dealing with chronic devastating illnesses like Cancer and AIDS, the public must know that the federal govt will back scientific treatments based on the best possible data. There is no room for anti-scientific treatments. Only with solid, transparent trials of treatments, backed by the best possible treatments, and with solid whistleblower protection, can we move forward. Medicine is based on truth. It is time to end the dark ages, and protect all medical whistleblowers.

Dear Gil,

I hope, after consideration, you decide that you would like to uphold the Hippocratic tradition, and to support quality patient care for HIV patients. If you do, please append a comment to the following article.

I hope we can achieve total unity to uphold this simple, critical concept.

Subject: Support Hippocratic Oath!

Dear Friends,

It is hard to believe that the Hippocratic Oath has become controversial. I beleive this is one thing all doctors must agree on. In times of reform, quality patient care and Hippocratic tradition must be preserved. Please indicate your support for the Hippocratic tradition, and for scientific medical care, by placing a note on the following article.

<http://www.opednews.com/articles/Doctors-Urge-Transparency-by-James-Murtagh-090619-746.html>

Thank you. If we stand for nothing else, we need to agree with TAC that the Hippocratic Tradition remains essential in treating all diseases, no exceptions.

Subject: Re: Jim What' s Your Relationship with TAC ?

Feel free to call me if you would like to know more. I have no obligation to answer any questions from you, especially after you broke your word, and after your attempt to extort me.

Questions for you: why did you violate my privacy and publish private email? Why did you ask me to give false testimony about TAC? Your request for false information was indeed a form of extortion, to which no real answer was needed.

Subject: Fwd: Do you denounce Mahmoud Ahmadinejad?

Why do you not answer my questions?

Do you support Mahmoud Ahmadinejad? Why do you not endorse the Hippocratic oath? Why do you not endorse scientific treatments for serious illnesses like Cancer and AIDS?

Why should I answer your questions if you will not answer mine? Apparently, you do support Mahmoud Ahmadinejad, so why would I want to deal with you?

Why should I have any TRUST in you after you have violated your word hundreds of times? You promised not to release private and confidential email, but you have done this in your partnership with Clark Baker.

I tested to see if you were a man of your word, and if you would keep the email private. You did not. There is no need for further discussion unless you want to call.
